Financial Management Bachelor School of Accounting Full-time	Shanghai
GPA: 3.61/4.0 (Top 20% in Major)	
Core Courses: Cost and Management Accounting (90), Advanced Financial Accounting (92), Linear Algebra (94), Financial Management (89): Focused on financial statement analysis and valuation techniques), Advanced Mathematics II (87), Investment Theory (83)	
The Chinese University of Hong Kong	Sep 2025 - Dec 2025
Financial Management Bachelor Exchange	Hong Kong
Core Courses: Contemporary Accounting Information Systems, China Taxation, Data Management and Big Data Analytics, Corporate Finance: Theory and Practice	

PROFESSIONAL EXPERIENCE

China International Capital Corporation Limited	Dec 2025 - Jun 2026
Intern Research	Shanghai
In-Depth Equity Research: Independently authored 2 in-depth single-stock research reports, delivering the full research workflow, including industry structure, core competitiveness, second-growth-curve analysis, financial forecasting, valuation, and investment recommendations, supporting the team's stock coverage and institutional roadshows. Research Output: Produced 10+ research notes, including earnings reviews and industry commentaries, built on a self-constructed cycle-tracking framework using macro and industry high-frequency data; performed marginal-change decomposition to assess industry cycle positioning and inform the team's investment thesis updates. Segment Valuation: Built 3-statement models for 3–5 year forward earnings forecasts and conducted business-segment valuations for covered stocks; estimated investment income across 28 semiconductor projects via shareholding penetration and 3-scenario P/S & P/E valuation, quantifying second-growth-curve value.	
Huayuan Securities	Jun 2025 - Jan 2026
Intern Pharmaceutical Team	Shanghai
In-Depth Industry Report: Authored core chapters of a 60-page in-depth report on the small-nucleic-acid drug sector, covering market sizing, pipeline evaluation, and valuation modeling; the report was adopted for institutional roadshows to support investment decisions. Fundamental Research: Conducted in-depth fundamental research across the sector, developing actionable investment insights from clinical trial reports, academic literature, and listed-company data to support senior analysts' coverage. Data & Valuation Modeling: Performed data mining and cross-validation for 30+ innovative drugs using professional databases (e.g., Citeline, EvaluatePharma), building quantitative valuation models to underpin the team's investment thesis.	
KPMG Huazhen LLP, Shanghai Branch	Jan 2025 - Feb 2025
Audit Intern CP7	Shanghai
- Completed audit working papers for 10+ accounts across 3 project teams (e.g., fixed assets, payroll), performing asset revaluation and depreciation calculations in Excel with accurate variance analysis. - Prepared lease-liability working papers and organized key data for 12 lease contracts; coordinated with clients to resolve material discrepancies, supporting three teams' annual audit progress.	

PROJECT EXPERIENCE

The 11th National Statistical Modeling Competition for College Students	Jul 2025 - Aug 2025
Core Team Member	
Framework Development: Led the design of the project's analytical framework, integrating macro industry trends, micro-level business analysis, and competitiveness evaluation; defined research pathways and task allocation for the team. Output: Sole author of the final 10,000-word research paper, converting team research into a rigorous, data-driven deliverable; awarded Second Prize at the municipal level.	

SKILLS, CERTIFICATIONS & OTHERS

- Programming & Backend:** Vibe Coding; Python (Pandas for data cleaning, analysis, and financial modeling); FastAPI for building RESTful API services; SQLite for data persistence; SQL for querying financial datasets
- Data & Quant Analysis:** Financial market data acquisition and processing via AKShare; technical-indicator computation (MA, MACD, RSI); LLM API integration (Anthropic / MiniMax) for automated equity and sentiment analysis
- Visualization & Frontend:** React and ECharts for interactive data dashboards; Tableau (dashboards); Excel; Think-cell (charting)
- Languages:** English (IELTS 6.5); Mandarin (Native)

SUMMARY

Financial Management student (Top 20%) at SUFE with hands-on equity research experience across the semiconductor and pharmaceutical sectors at leading securities firms. Skilled in financial modeling (3-statement, segment, and PB valuation), fundamental analysis, and quantitative tooling (Python, SQL, Vibe Coding). Proven ability to independently deliver research reports adopted for institutional roadshows.
